

MOJO BARRIER 45° POSITIVE CORNER [GREEN], SILVER

The MOJO Barrier 45° Positive Corner—available in black or silver—creates sharp, secure angles in barricade lines, making it ideal for concerts, festivals, and high-capacity events.

SKU: N/A | **Categories:** [Crowd Control & Fencing Solutions](#), [MOJO Barriers](#)

PRODUCT DESCRIPTION

The MOJO Barrier 45° Positive Corner, also known as the "Green Corner," is designed for creating strong, well-defined angles in crowd control layouts. With its precise 45° angle, it safely directs crowd flow away from high-risk areas such as stage fronts, backstage access points, and pathways.

Built with a full floorplate and a rear brace, this barrier ensures maximum stability even under heavy pressure. The sloped, anti-slip floorplate reduces trip hazards, while the integrated step gives security personnel elevated access for improved crowd monitoring.

Available in **silver** for traditional, high-visibility environments, the 45° Positive Corner integrates seamlessly into any MOJO barricade system. Its single-bolt interlocking connection allows for fast installation and strong alignment with straight sections, gates, and other corner types.

Key Features of the MOJO Barrier 45° Positive Corner:

- **Defined 45° Angle** – Creates sharp turns in barricade lines for structured layouts.
- **Silver Finish Available** – For classic stage builds.
- **Full Floorplate & Rear Brace** – Ensures stability in high-pressure environments.
- **Integrated Step Platform** – Improves safety and visibility for event security teams.
- **Modular Interlocking System** – Compatible with all MOJO Straight, Gate, and Corner Barriers.
- **Lightweight & Durable** – Welded aluminium frame for strength and easy transport.

Ideal Applications:

- **Concerts & Festivals** – Form secure corners around stage thrusts, FOH areas, and VIP zones.
- **Stadium Events** – Shape barrier lines for crowd safety in high-capacity venues.
- **Broadcast & Touring** – Choose black finishes for discreet stage aesthetics, or silver for visibility.
- **Event Access Control** – Direct flow in high-traffic areas such as backstage entries and exits.
