

MOJO BARRIER MEGA EXIT GATE

The MOJO Barrier Mega Exit Gate provides a secure, large-scale access point for pedestrians, service vehicles, and emergency response at major events.

SKU: 1002541.00 | **Categories:** [MOJO Barriers](#)

PRODUCT DESCRIPTION

The **MOJO Mega Exit Gate** is a critical component in professional crowd control systems, designed to maintain safety while ensuring smooth, controlled access at high-traffic events. With a **3m (9.84ft) wide opening**, it allows both pedestrian flow and vehicle entry, making it indispensable for festivals, concerts, sporting events, and emergency planning.

Constructed with **durable aluminium doors** and **black steel floorplates**, the Mega Exit Gate integrates seamlessly with MOJO Straight Barriers to form a continuous, stable barricade line. The **double-wing design** opens away from the crowd, ensuring safe evacuation or controlled entry when required.

For fast, reliable operation, the gate features a **vertical bolt locking system** with a foot lever, combining strong security with rapid release capability. The **sloped floorplates** allow easy passage for service and emergency vehicles without the need for additional ramps, improving event logistics and safety readiness.

Whether used for emergency preparedness, controlled entry points, or large-scale event logistics, the MOJO Mega Exit Gate ensures safe, compliant, and efficient access management.

Key Features of the MOJO Barrier Mega Exit Gate:

- **Wide Access Opening** – 3m double-wing gate for pedestrians and vehicles.
- **Durable Construction** – Aluminium doors with black steel floorplates for stability.
- **Secure Locking System** – Vertical bolt with foot lever for fast release and reliability.
- **Vehicle-Ready Floorplates** – Sloped design eliminates the need for ramps.
- **Crowd-Safe Design** – Doors open away from the crowd for controlled evacuation.
- **System Compatibility** – Integrates seamlessly with all MOJO Straight Barriers.

Ideal Applications

- **Festivals & Concerts** – Manage controlled crowd entry and exit points.
- **Sporting Events** – Allow safe movement of spectators and service vehicles.
- **Emergency Access** – Ensure rapid entry for first responders or evacuation routes.
- **Event Logistics** – Provide access for suppliers and production teams without compromising crowd safety.

TECHNICAL SPECS

Opening Width	3m
Material	Aluminium doors with black steel floorplates
Locking Mechanism	Vertical bolt with foot lever release
Floorplate Design	Sloped for vehicle and pedestrian access

Compatibility

Integrates with the full MOJO Barriers series
