

MOJO BARRIER STRAIGHT, SILVER & BLACK

The MOJO Barrier Straight is the industry-standard concert barricade, engineered for superior stability, fast setup, and professional stage aesthetics. Available in both black and silver finishes, it's trusted worldwide for safe crowd control at concerts, festivals, sporting events, and live productions.

SKU: N/A | **Categories:** [Crowd Control & Fencing Solutions](#), [MOJO Barriers](#)

PRODUCT DESCRIPTION

The MOJO Barrier Straight delivers unmatched safety and versatility for high-capacity events. Built from welded aluminium, these lightweight yet robust barricades are designed to withstand extreme crowd pressure while enabling quick deployment and reconfiguration. Two finish options are available:

- **Black (anodised):** Provides low-visibility for concerts, film sets, broadcast productions, and award shows where a discreet stage look is essential.
- **Silver:** Offers a traditional, high-visibility finish suited to festivals, stadiums, and daylight events where crowd safety visibility is a priority.

Both variants interlock seamlessly within the same system, allowing flexible hybrid layouts that combine black and silver sections as needed. Each unit connects with a secure nose-plug system, supported by a single bolt and location pin. The sloped base plate minimises trip hazards and allows drainage, while the integrated rear step gives security staff elevated visibility and rapid access. Rounded top rails provide comfort for attendees pressed against the barrier line.

MOJO Straight Barriers form the backbone of modular crowd management, fully compatible with corners, gates, cable bridges, and the complete MOJO Barrier range. Whether securing a stadium stage front or managing restricted access zones, they remain the global benchmark for professional event barricades.

Key Features of the MOJO Barrier Straight:

- Choice of **black** (discreet) or **silver** (high-visibility) finish
- Welded aluminium frame – strong, durable, yet lightweight
- Rear step platform for elevated security observation
- Sloped, anti-slip base plate reduces trip hazards and water build-up
- Nose-plug connection with bolt and pin fastening for secure interlocking
- Rounded top rail for added comfort in high-pressure crowd areas
- Fully compatible with all MOJO Barrier components

Ideal Applications:

- Front-of-stage barricades at concerts, festivals, and stadiums
- Award shows, TV recordings, and corporate productions
- VIP zones, FOH perimeters, and secure backstage access
- Queue management at high-traffic venues and large-scale events
