

MOJO FLEX CORNER BARRIER, SILVER & BLACK

The MOJO Flex Corner Barrier—available in black or silver—offers adjustable angles from -90° to $+90^{\circ}$, delivering unmatched versatility for custom barricade layouts at concerts, festivals, and major events.

SKU: N/A | **Categories:** [Crowd Control & Fencing Solutions](#), [MOJO Barriers](#)

PRODUCT DESCRIPTION

The **MOJO Flex Corner Barrier** is designed for maximum flexibility in crowd control systems, enabling smooth and secure transitions in barricade lines. With adjustable angles ranging from **-90° to +90°**, it can adapt to even the most complex event layouts, including front-of-house (FOH) positions, camera platforms, and curved stage edges.

Unlike fixed-angle barriers, the Flex Corner uses **hinged wings** to achieve precise angle adjustments, while the **no-floorplate design** makes it suitable for uneven surfaces or tight spaces where standard barricades won't fit.

For stability, the Flex Corner must be installed between two MOJO Straight Barriers, ensuring the strength and safety expected from the MOJO system. Available in **black** for discreet stage aesthetics or **silver** for traditional setups, it integrates seamlessly with the entire MOJO Barrier range.

Key Features of the MOJO Flex Corner Barrier:

- **Adjustable Angles** – From -90° to +90°, perfect for complex layouts and curved structures.
- **Two Finishes Available** – Black for low-visibility use, silver for high-visibility setups.
- **Hinged Wing Design** – Enables smooth transitions and precise angle control.
- **No Floorplate** – Ideal for uneven ground or challenging event sites.
- **Stable & Secure** – Requires connection between two MOJO Straight Barriers.
- **System Compatibility** – Interlocks with all MOJO barriers for modular layouts.

Ideal Applications:

- **Concerts & Festivals** – Shape barricade lines around stages, thrusts, or curved designs.
- **FOH & Camera Platforms** – Create smooth transitions around technical zones.
- **Broadcast & Touring** – Choose black for discreet productions or silver for visible builds.
- **Event Access Areas** – Control flow in narrow or irregular spaces.

TECHNICAL SPECS

Weight	44.09 kg
Dimensions	0.39 × 46.46 × 1.97 m
Angle Range	Adjustable from -90° to +90°
Material	Welded aluminium, black or silver finish
