

MOJO HIGH FENCE VARIO, BLACK & TRANSPARENT

Extend your MOJO Vario Corner with the **MOJO High Fence Vario**, a tall barricade extension available in **black** and **transparent** finishes. Designed for curved or angled layouts, it provides privacy, security, and flexibility at concerts, festivals, and stadium events.

SKU: N/A | **Categories:** [MOJO Barriers](#)

PRODUCT DESCRIPTION

The **MOJO High Fence Vario** raises the standard **MOJO Vario Corner** to approx. **2.4 m** in height, creating a secure perimeter that blends privacy and control with flexible layout options. Built with a reinforced aluminium frame and durable multiplex or polycarbonate panels, it is designed for **complex event configurations** such as round stages, backstage compounds, and VIP zones.

Choose the finish that matches your event needs:

- **Black Multiplex** – creates a full **sightline block**, ideal for privacy in VIP compounds, backstage areas, or restricted zones.
- **Transparent Polycarbonate** – provides **clear visibility** for security teams while maintaining strength and crowd resistance.

The High Fence Vario connects directly to MOJO Vario Corners using the **standard interlocking system**, ensuring seamless integration within any MOJO barricade line. With its flexible hinge design, it adapts easily to angled layouts while handling heavy crowd pressure in high-traffic areas.

Key features of the MOJO High Fence Vario:

- **Added Height & Security** – extends MOJO Vario Corners to ~2.4 m.
- **Privacy or Visibility Options** – multiplex panels for sightline kill; transparent polycarbonate for line-of-sight.
- **Flexible Layouts** – hinge design supports curved or angled barricade setups.
- **Strong & Reliable** – withstands pressure in high-capacity event zones.
- **Fast Assembly** – interlocks with Vario Corner and other MOJO barriers.
- **Integrated Access** – compatible with MOJO doors, gates, and exits.
- **Professional Look** – cleaner, more durable alternative to temporary fencing.

Ideal applications:

- **VIP & backstage compounds** – secure high-profile areas.
- **Concerts & festivals** – provide tall, tamper-resistant barriers in curved or angled layouts.
- **Stadiums & arenas** – protect restricted or high-traffic zones.
- **Broadcast & touring** – discreet privacy panels or clear-view security perimeters.
