

## MOJO SNAKE GATE BARRIER, SILVER & BLACK

The MOJO Snake Gate Barrier offers a wider gate-style opening for equipment, flight cases, or crew access, while still supporting cable routing through the barrier line.

**SKU:** N/A | **Categories:** [Crowd Control & Fencing Solutions](#), [MOJO Barriers](#)

## PRODUCT DESCRIPTION

The **MOJO Snake Gate Barrier** provides a **0.85 m wide** hinged gate, allowing both crew access and cable feed-through in barrier lines. This dual-purpose unit is ideal for camera platforms, mix positions, or sections of the barrier line where both personnel and cables need to cross. The gate does **not include a continuous floorplate** across the opening, but uses locking bolts to maintain barrier strength when closed.

Like other MOJO components, the Snake Gate is available with **black** or **silver** finishes and interlocks with standard Straight Barriers. It handles cables up to **35 mm** and is engineered for moderate crowd pressure areas, though not intended for the absolute front-of-stage strain zones.

This unit is best used in less high-load segments where access and cable routing are equally needed.

### Key Features of the MOJO Snake Gate Barrier:

- 0.85 m wide hinged gate for personnel & cable access
- Supports cables up to 35 mm thickness
- Built-in locking bolts preserve barrier line stability
- Black or silver finish to suit event design
- Interlocks seamlessly with MOJO Straight Barriers

### Ideal Applications:

- Camera platforms / mix positions needing both access and cables
- Backstage or FOH crossover points
- Moderate crowd pressure areas where personnel movement is needed

## TECHNICAL SPECS

<b>Weight</b>	446 kg
<b>Material</b>	Welded aluminium frame, black or silver finish
<b>Colour</b>	Silver, Black
<b>Gate width</b>	0.85 m
<b>Cable thickness capacity</b>	Up to 35 mm
