

MOJO SNAKE RUNNER BARRIER, SILVER & BLACK

The MOJO Snake Runner Barrier provides a hinged, door-style opening in the barrier line for safe cable feed-through, without compromising crowd control strength.

SKU: N/A | **Categories:** [Crowd Control & Fencing Solutions](#), [MOJO Barriers](#)

PRODUCT DESCRIPTION

The **MOJO Snake Runner Barrier** is a specialized barrier component built to enable crew to pass multicore cables or power lines through the barricade. Designed primarily for front-of-stage areas, this unit features a fixed vertical section with full floorplate, rear step, bracing, and a hinged door section to maintain continuous strength and easy access.

Available in **black** or **silver**, the Snake Runner locks securely with a built-in bolt, and connects to adjacent MOJO Straight Barriers using the same interlocking nose-plug system. The door opens toward the crowd and accommodates cable bundles up to **35 mm** thick. With a **door width of 0.50 m**, it allows safe cable runs while preserving the integrity of the barrier line.

This section is ideal where you need to feed cables post-installation or during load-out without disrupting the barrier line. It is engineered for high crowd pressure zones thanks to its full floorplate, braced section, and rear platform.

Key Features of the MOJO Snake Runner Barrier:

- Hinged door (0.50 m width) for cable feed-through
- Supports cables up to 35 mm thickness
- Fixed section has floorplate, double braces, rear step
- Built-in lock bolt ensures barrier line continuity
- Black or silver finish to match event aesthetics
- Interlocks with MOJO Straight Barriers

Ideal Applications:

- Front-of-stage power or audio/AV cable routing
- Post-loadout cable management without breaking the barrier line
- Zones requiring secure cable access with minimal disruption

TECHNICAL SPECS

Weight	446 kg
Colour	Silver, Black
Door width	0.50 m
Door opening direction	Toward crowd
Cable thickness capacity	Up to 35 mm
Finish variants	Black / Silver

Connection

Interlocks via nose-plug + bolt

Additional components on fixed section

Floorplate, braces, rear step
