

12M CLEARSPAN STRUCTURE

The 12m Clearspan Structure is a robust and versatile marquee, perfect for weddings, exhibitions, and large community events requiring premium shelter and flexible layouts.

SKU: N/A | **Categories:** [Clearspan Marquees](#), [Marquees](#)

PRODUCT DESCRIPTION

The 12m Clearspan Structure provides a premium, engineer-certified solution for large-scale events that demand strength, style, and versatility. With a wide 12m span and modular 5m bay extensions, this structure can be tailored to suit everything from wedding receptions and trade exhibitions to festivals and corporate pavilions.

Built with a heavy-duty steel clearspan frame and durable canvas roofing, the 12m Clearspan delivers full weather protection while maintaining an open, unobstructed interior — no centre poles — maximising usable space and visual impact. Choose between clear PVC or canvas side walls to match your event's aesthetic, privacy, and lighting requirements.

Optional 3m extension legs increase the eave height for staging, lighting, or vehicle access, giving you even greater flexibility across diverse event layouts. Fully engineer-certified and installed by Registered Building Practitioners, this structure ensures safety, compliance, and reliability for any major event setting.

Key Features of the 12m Clearspan Structure:

- **12m wide span** with modular 5m bay extensions
- Canvas roofing for full weather protection
- Side wall options: clear PVC or canvas panels
- 3m extension legs available for increased eave height
- Clearspan design – no internal poles, unobstructed floor space
- Suitable for grass, concrete, or raised platforms

Ideal Applications:

- **Large Weddings & Receptions** – spacious, elegant marquee for dining and entertainment
- **Corporate Exhibitions & Conferences** – professional, scalable venue solutions
- **Festivals & Concerts** – perfect for hospitality zones, bars, or performance areas
- **Sporting & Community Events** – reliable shelter for high-capacity audiences
