

15M CLEARSPAN STRUCTURE

The 15m Clearspan Structure is a premium large-scale marquee, designed for major events, exhibitions, and corporate activations that require expansive, unobstructed space.

SKU: N/A | **Categories:** [Clearspan Marquees](#), [Marquees](#)

PRODUCT DESCRIPTION

The 15m Clearspan Structure is engineered for premium, high-capacity events that demand scale, strength, and style. With a wide 15m span and modular 5m bay extensions, this marquee provides the versatility required for large dining layouts, exhibitions, concerts, and gala functions.

Its clearspan design eliminates internal poles, offering an entirely open and flexible interior that can accommodate anything from grand seating arrangements to staging and production builds. Canvas or clear PVC roofing and walling options allow organisers to customise each installation — whether aiming for a light-filled, transparent atmosphere or a private, enclosed venue.

Optional 3m extension legs increase the eave height, providing extra clearance for AV setups, lighting rigs, or tall décor elements, while portal brace frames enhance stability for long-span or high-wind applications. Fully engineer-certified and installed by Registered Building Practitioners, the 15m Clearspan combines professional presentation with proven reliability for events of any scale.

Key Features of the 15 Clearspan Structure:

- 15m span width with modular 5m bay extensions
- Canvas or clear PVC roofing options
- Side wall options: canvas or clear PVC panels
- 3m extension legs available for added height
- Portal brace frame for 10m & 15m structures
- Clearspan construction – no centre poles, complete design freedom
- Flexible installation on grass, hardstand, or platforms

Ideal Applications

- **Corporate Activations & Trade Shows** – professional, high-impact structures
- **Gala Dinners & Weddings** – premium marquee with impressive scale
- **Festivals & Concerts** – ideal for bars, catering, or backstage areas
- **Sporting Events & Community Functions** – reliable large-capacity shelter
