

4M CLEARSPAN STRUCTURE

Compact and flexible, 4m Clearspan Marquees are perfect for boutique events, pop-ups, and small-scale activations.

SKU: N/A | **Categories:** [Clearspan Marquees](#), [Marquees](#)

PRODUCT DESCRIPTION

Compact yet strong, the 4m Clearspan Structure provides a premium, engineer-certified solution for boutique events, pop-ups, catering zones, and small activations. Designed with a fully open interior and no centre poles, it delivers maximum usable space while maintaining a polished, professional appearance.

Built with a steel clearspan frame and durable canvas roofing, this structure offers dependable weather protection and a clean finish suited to both corporate and community events. Choose between clear PVC or canvas side walls to tailor visibility, ventilation, and presentation for your event needs.

The 4m Clearspan can be extended in modular 3m bays, allowing flexible sizing for tight sites or elongated layouts. Optional brace portal frames add structural reinforcement when additional stability is required — ideal for semi-permanent setups, high-wind conditions, or fitted entrances.

Installed by qualified crews and certified to Australian standards, the 4m Clearspan Structure is a safe, stylish, and adaptable choice for compact event spaces.

Key Features of the 4m Clearspan Structure:

- 4m span width, extendable in 3m modular bays
- Canvas roofing for durable, weatherproof coverage
- Side wall options: clear PVC or canvas panels
- Brace portal frame (4m) for enhanced strength and stability
- Clearspan design — no centre poles, full open interior
- Can be installed on grass, concrete, or platforms

Ideal Applications:

- Boutique activations & brand pop-ups – compact, high-impact event coverage
- Catering & back-of-house spaces – practical, weather-protected workspace
- Small exhibitions or displays – professional presentation for limited space
- Private parties & community events – elegant shelter for small gatherings
