

## 6M CLEARSPAN STRUCTURE

The 6m Clearspan Structure is a versatile, engineer-certified marquee ideal for weddings, festivals, exhibitions, and corporate functions—delivering a premium look with practical flexibility.

**SKU:** N/A | **Categories:** [Clearspan Marquees](#), [Marquees](#)

## PRODUCT DESCRIPTION

The 6m Clearspan Structure offers a premium, engineer-certified marquee solution for weddings, festivals, exhibitions, and corporate activations. Combining strength with style, this mid-size structure provides an open, unobstructed interior — no centre poles — maximising usable space for dining, displays, or event infrastructure.

Modular by design, the 6m Clearspan can be configured in 3m or 4m bay increments, allowing flexible lengths to suit any layout. Choose between canvas or clear PVC roofing and solid or clear side walls, creating anything from a bright, weatherproof corporate pavilion to a fully transparent marquee with natural light.

For increased functionality and stability, optional overhead brace frames (6×3m or 6×4m) and 3m extension legs are available, ideal for high-clearance or wind-exposed sites. These enhancements make the structure suitable for installations on grass, concrete, or elevated platforms.

Installed by qualified crews and certified to Australian standards, the 6m Clearspan Structure delivers strength, flexibility, and a polished finish for both city and regional events.

### Key Features of the 6m Clearspan Structure:

- 6m span width with modular lengths in 3m or 4m bays
- Canvas or clear PVC roof options
- Canvas or clear PVC side wall options
- Optional overhead brace frames (6×3m or 6×4m) for added strength
- Optional 3m extension legs for additional clearance
- Clearspan design — no internal poles for maximum usable space
- Fully engineer-certified and compliant with Australian standards

### Ideal Applications:

- **Weddings & Private Events** – stylish yet practical mid-sized marquee
- **Corporate Events & Expos** – clear, functional space for branding and displays
- **Festivals & Community Functions** – adaptable structure for dining, stalls, or shade
- **Exhibition Halls** – modular extensions create long, seamless layouts
