

1200KG WEIGHT

Maximum-strength ballast for the heaviest marquees, staging, and long-term event builds.

SKU: 1011927.00 | **Categories:** [Marquee Weights](#), [Marquees](#)

PRODUCT DESCRIPTION

The **1200kg Weight** is the heaviest ballast option, engineered for the most demanding event installations. These weights are used where absolute stability is required—such as large-scale clearspan structures, temporary buildings, staging roofs, or long-term marquee projects exposed to high wind loads.

Despite their size, the 1200kg Weights are forklift-compatible and stackable, making them practical for transport, positioning, and secure storage. Built with durability in mind, they are weatherproof and suitable for exposed outdoor environments across Australia.

Key Features of the 1200kg Weight:

- **Maximum Holding Power** – Provides unmatched stability for the heaviest structures.
- **Forklift-Friendly** – Designed for quick, safe placement and removal.
- **Weather-Resistant** – Built to perform in harsh outdoor conditions.
- **Stackable Format** – Easy storage and adaptable deployment.

Ideal Applications:

- Extra-large clearspan marquees and long-term event structures.
- Stage roofs and production platforms requiring maximum ballast.
- High wind-load or exposed outdoor event sites.
- Large exhibitions, festivals, and temporary building projects.

TECHNICAL SPECS

Weight	1200 kg
Dimensions	1.04 × 0.61 × 0.72 m
Material	Galvanised steel/treated ballast
Design	Forklift-compatible, stackable
