

30KG STACKABLE WEIGHT

Reliable ballast for securing marquees, fencing, and event structures.

SKU: N/A | **Categories:** [Marquee Weights](#), [Marquees](#)

PRODUCT DESCRIPTION

The **30kg Stackable Weight** is a compact, versatile ballast option designed for stabilising marquees, canopies, fencing, and temporary event infrastructure. Easy to handle and transport, these weights can be stacked neatly for added load, ensuring safe installation in both indoor and outdoor environments.

With a slim profile, they are ideal for use where space is limited, such as footpaths, event sites, and high-traffic areas. Built from durable materials, they provide long-lasting performance and are suitable for repeated hire applications across festivals, exhibitions, and corporate events.

Key Features of a 30kg Stackable Weight:

- **Compact Design** – Easy to move, transport, and store.
- **Stackable Format** – Add weight as required for flexible ballast solutions.
- **Durable Construction** – Designed for outdoor and indoor event conditions.
- **Versatile Applications** – Stabilises marquees, fencing, umbrellas, signage, and other structures.

Ideal Applications:

- Securing small marquees and canopies.
- Providing ballast for picket or crowd control fencing.
- Weighing down signage, umbrellas, and temporary installations.
- Use in compact event sites with limited ground penetration.
