

700KG WEIGHT

Super-heavy ballast for securing the largest marquees and event structures.

SKU: 1011933.00 | **Categories:** [Marquee Weights](#), [Marquees](#)

PRODUCT DESCRIPTION

The **700kg Weight** is designed for major event installations where extreme stability is essential. Commonly used for large clearspan marquees, stage roofs, and high-risk outdoor builds, these weights provide the secure anchoring required to meet strict safety and engineering standards.

Thanks to their compact, stackable design, the 700kg Weights can be positioned with precision around structures and are forklift-compatible for fast placement and removal. Built for long-term reliability, they are weather-resistant and suitable for use on exposed sites with variable conditions.

Key Features of the 700kg Weight:

- **Super-Heavy Stability** – Anchors the largest event structures securely.
- **Forklift-Compatible** – Easy positioning and removal on event sites.
- **Weatherproof & Durable** – Engineered for outdoor use in all climates.
- **Stackable Design** – Practical for storage and flexible deployment.

Ideal Applications:

- Large clearspan marquees and exhibition structures.
- Stage roofs and production platforms.
- High-risk outdoor sites with wind-loading concerns.
- Long-term event builds requiring extra ballast.

TECHNICAL SPECS

Weight	700 kg
Dimensions	0.76 × 0.61 × 0.72 m
Material	Galvanised steel/treated ballast
Design	Forklift-compatible, stackable
