

SUPA-TRAC[®] TURF PROTECTION FLOORING

Temporary turf and lawn protection for concerts, festivals, and sporting events — engineered for fast installation, strength, and accessibility.

SKU: 1002391.00 | **Categories:** [Temporary Flooring & Ground Protection](#), [Turf Protection Flooring](#)

PRODUCT DESCRIPTION

Supa-Trac is a lightweight, heavy-duty modular flooring system designed to protect natural turf and sensitive ground surfaces during events. Constructed from durable polypropylene copolymer, the interlocking panels create a stable, non-slip surface for pedestrians, carts, and light vehicles — without damaging the grass underneath.

Whether you're managing a stadium concert, community festival, or corporate activation on parklands, Supa-Trac delivers safe, breathable ground cover that keeps turf alive even under multi-day use. Its ventilated design allows air, water, and light to reach the grass, minimising stress and post-event recovery time.

As part of No Fuss Event Hire's commitment to inclusive event infrastructure, we're the only company in Australia to offer wheelchair-compliant Supa-Trac and edging systems, ensuring accessible, continuous flooring across any event site. Combined with compatible ramps and smooth transitions, Supa-Trac provides a safe, professional surface for all users — including those with mobility aids.

Quick to deploy and adaptable to any layout, Supa-Trac is the trusted choice for large-scale events, stadium builds, and high-traffic outdoor environments across Australia.

Supa-Trac Turf Protection Flooring Key Features:

- **Turf-Safe Design** – Ventilated panels allow light, air, and water through to keep grass healthy
- **Wheelchair-Accessible System** – Exclusive wheelchair-compliant Supa-Trac® & edging available only from No Fuss Event Hire
- **Durable Load Performance** – Handles heavy foot traffic, staging, carts, and light utility vehicles
- **Fast Assembly** – Patented click-lock system, no tools required
- **Slip-Resistant Surface** – Ribbed finish provides safe footing in all weather
- **Lightweight & Modular** – Easy to transport, scalable for events of any size
- **All-Weather Performance** – Suitable for sun, rain, and variable conditions

Ideal Applications:

- Outdoor concerts & music festivals
- Stadium turf protection for sports events
- Temporary tent & marquee flooring
- Pedestrian walkways and platforms
- Accessible routes and entryways for mobility users
- Broadcast camera decks & FOH risers
- Hospitality and VIP zones on grass
- Light vehicle access routes across sensitive turf

Weight	11 kg
Dimensions	1 × 1 m
