LD20 ROLLS

Unique Drivable Aluminum Flooring

LD Rolls Drivable Flooring—also known as LD20 Rolls—are a lightweight, strand-cast aluminum flooring solution built for fast-paced event environments and light-duty construction zones. Whether you're running cables across a stadium, loading gear with forklifts, or building a temporary access road for utility carts and crew vehicles, LD Rolls deliver fast setup, safe traction, and rugged durability. This unique drivable flooring makes handling such environments straightforward.

Each roll is 20 meters long and covers 60 m², providing instant coverage over turf, asphalt, gravel, or stadium floors. The slightly textured surface ensures a secure grip for pedestrians while supporting vehicles with evenly distributed loads. Its low-profile design reduces trip hazards and protects sensitive ground, making it perfect for zones that need LD Rolls drivable flooring capabilities.

TECHNICAL SPECS:

Dimensions	20m x 3m x 20 mm
Weight	1215 kg per 20 m roll
Material	Strand-cast aluminum
