SUPAMATS

Temporary Flooring and Roadway Matting

Supamats are made from 100% recycled high density 13mm thick Polyethylene plastic. Whether you have an access problem at an event, on a construction site, or even in your backyard, these mats are the ultimate access solution or temporary roadway to suit your requirements.

Supamats are constructed with rapid access in mind and are suitable to allow access for all types of machinery. Each mat weights 33kg and is both easy to install and durable. You simply lay the mats down on the existing troublesome surface and then remove once finished. No more spin outs. Supamats work equally well in sand and snow conditions and are unaffected by heat or cold.
